

Hopefully everyone enjoyed a wonderful holiday season! Recently we completed our migration to **Sprint 41** and are now performing development work for **Sprint 42**. We are actively preparing for our annual User Group Conference to be held on April 22nd at the Pine Barn Inn in Danville, PA. Here's what is included in this issue:

- [New KeyHIE Participants](#)
- [KeyHIE Leads the Way with Life Image Integration](#)

- [DHS Announces DOC Onboarding to P3N](#)
  - [Mammosphere Offers Mammogram Portability](#)
  - [KeyHIE Featured in NextGate Case Study](#)
  - [2020 KeyHIE User Group Meeting](#)
- 

## Welcome New KeyHIE Participants!

- Greater Vision Eye Associates, LLC
- 

# KeyHIE Updates

---

## KeyHIE and Life Image Implement the First FHIR-based Imaging App in the US to Share Diagnostic Content in a Provider Portal

KeyHIE is leading the way in health information exchange by being the first in the United States to offer FHIR-based access to patient imaging via our KeyHIE Portal.

KeyHIE Participants are able to access diagnostic content through the Life Image Viewer app from within the KeyHIE Portal without requiring a separate login. Be sure to check out the article [here](#)!

---

## PA Department of Corrections Successfully Onboarded to P3N

# **pennsylvania**

## **DEPARTMENT OF HUMAN SERVICES**

As of November 8, 2019 all Pennsylvania Department of Corrections (DOC) state-run correctional facilities are now connected to the the Pennsylvania Patient & Provider Network (P3N), administered by the Pennsylvania Department of Human Services (DHS). This connection allows electronic sharing of health information with all five Pennsylvania Health Information Exchanges, including KeyHIE. Exchange of inmate PHI allows providers to treat patients quickly and eliminate duplicative testing, ensuring effective care both during incarceration and following re-entry into the community. For more information, the entire press release can be found [here](#).

---

## Mammosphere by Life Image Offers Women Easier Access to Prior Mammograms

A [recent article](#) from Axis Imaging highlights a grant-supported initiative from KeyHIE to bring mammogram portability to Geisinger patients. The Mammosphere app software from Life Image allows women to easily share their prior mammograms with their treating provider without a lengthy and arduous transfer process. Geisinger launched an educational initiative in October to inform patients of the new offering and allow them to complete the required consent. Be sure to check out the entire article [here](#).

---

## [KeyHIE Featured in NextGate Case Study on Patient Matching](#)

A recent [case study](#) by NextGate featured KeyHIE's effort to improve data quality through our electronic master patient index (EMPI). KeyHIE utilizes MatchMetrix to improve patient matching, and works continually to ensure low duplicate rates. Recent developments regarding the lifting of a funding

ban for a National Patient Identifier (NPI) will continue to shape the landscape of patient matching in the upcoming years. Feel free to check out the case study in more detail [here](#).

## 2020 KeyHIE User Group Meeting

### Save the Date!!!

Work is underway for our 2020 User Group Conference, which will take place on **April 22, 2020** at The Pine Barn Inn in Danville, PA. The 2020 Conference will feature the following:

- KeyHIE Showcase Gallery with live demos
- Engaging speakers
- Patient success stories
- TEFCA Information

- Much more

The upcoming conference is shaping up to be even better than years past, so you will not want to miss it!
