KeyHIE

Update

Autumn 2019

Autumn is upon us, bringing cool crisp nights and colorful leaves! As the seasons change, KeyHIE continues to offer our Participants new collaboration opportunities to improve patients' health. Recently we completed our migration

to Sprint 40 and are in the initial stages of Sprint 41. Here's what is included in this issue:

- New KeyHIE Participants
- KeyHIE Lab Delivery
- MatchMetrix v10 Upgrade
- Prescription Drug Monitoring Program
- New Facilities and Connections
- eHealth Exchange Updates
- 2020 KeyHIE User Group Meeting

Welcome New KeyHIE Participants!

- Mountain View Nursing, LP
- Mystic Meadows Rehabilitation & Nursing Center
- Our Lady's Center for Rehabilitation & Healthcare

KeyHIE Updates

KeyHIE Lab Delivery

KeyHIE continues to lead the way in providing value for our Participants and providing critical data that is needed at the point of care. One way in which we accomplish this is through our ever-expanding lab delivery via KeyHIE's Information Delivery Service.

In order to accomplish this, KeyHIE partners with a variety of clinical laboratories and electronic medical record vendors to enable a direct interface by which lab orders and results may be delivered. This replaces time-consuming and inefficient manual processes that allow clinicians and staff to spend more time with their patients and less time attempting to obtain paper results. If you are interested in learning more about this service, please contact us at KeyHIEAdmin@KeyHIE.org!

During the second week of December, KeyHIE will be upgrading our NextGate Electronic Master Patient Index (EMPI) from MatchMetrix Version 8 to Version 10. Two primary goals of this migration are to enable improved patient matching functionality and greater interoperability with existing organizational EMPIs. In addition, this move from an on-premise solution to a hosted instance will allow KeyHIE to attain greater resiliancy and availability in the event of an unplanned downtime.

KeyHIE has successfully demonstrated its connection to the Pennsylvania Department of Health's Prescription Drug Monitoring Program (PDMP). This integration will allow Providers to take part in this vital effort to combat the growing epidemic of prescription drug abuse. Stay tuned for more information on how you can participate in the future!

New Facilities and Connections

The following facilities are now live with KeyHIE:

ADT Feed

- AtlantiCare to NJHIN

eHealth Exchange Updates

The VA's Veterans Health Information Exchange (VHIE) will undergo a major change in January 2020, affecting all query-based exchange partners, including KeyHIE:

- As part of the Mission Act, the VA will transition to an informed Opt-Out model, where signed authorization will no longer be required prior to sending documents in response to a query.

Additionally, KeyHIE is now live with the following connections to the nationwide eHealth Exchange:

- MedVirginia
- Davita Dialysis

2020 KeyHIE User Group Meeting

Save the Date!!!

KeyHIE is already planning our 2020 User Group Conference, which will take place on **April 22, 2020**. The 2020 Conference will feature the following:

- KeyHIE Showcase Gallery with live demos
- Engaging speakers

- Patient success stories
- TEFCA Information
- Much more

The upcoming conference is shaping up to be even better than years past, so you will not want to miss it!
